ABOUT

I've spent 10+ years helping startups and global teams figure out the hard stuff — what to build, why it matters, and how it should feel. I work end-to-end: Brainstorming, Wireframes, UX audits, Figma handoffs, and everything in between. My background in code means I don't just hand off designs — I stay in the room with developers and PMs until it ships right.

Design Arsenal

UX & Product Strategy	UX Audits, Product Thinking, User-Centered Design, Information Architecture
UI & Experience Design	UI Design, Interaction Design, End-to-End Product Design, Responsive Design
Design Execution	Wireframing, High-Fidelity Design, Interactive Prototyping, Design Systems
Team Collaboration	Developer Handoff, Cross-Functional Collaboration, Creative Problem-Solving
Tools & AI Workflow	Figma, lovable, Stitch, Claude, Sketch, Adobe Photoshop, ChatGPT, Gemini

Professional Experience

Revfin [↗](#)

Jan 2024 - Present

Senior Product Designer

New Delhi India

- **Real-Time Vehicle Intelligence Dashboard:** A real-time IoT vehicle tracking dashboard monitoring 70,000+ financed EVs across India, with live status tracking, geofence management, and loan-level context for operations and recovery teams.
- **TVR (Tele Verification Module):** Transforming a fragmented, manual phone verification process into a unified, intelligent platform for tele-agents — reducing duplicate calls, missed verifications, and data loss across the loan origination lifecycle.
- **Fleet Inspection App:** Developed an AI-powered fleet inspection mobile app for agents and managers, featuring real-time vehicle scanning via camera with automatic damage detection using ML models. Integrated OCR-based number plate recognition to auto-fetch vehicle details, streamlining the entire inspection workflow from scan to report generation.
- **Collection & Field Inspection App Module:** Revamped UI/UX and introduced new features across Collection and Field Inspection modules, enabling agents to digitally collect EMI payments and verify customer details on-site for seamless loan disbursement.
- **Carbon Credit Platform:** Designing a web platform to onboard and manage EV vehicles, automatically calculating carbon credit scores based on distance covered, CO₂ saved, and energy consumption — with a real-time analytics dashboard for tracking credits by vehicle type.
- **Revfin Website:** Took end-to-end ownership of the full website revamp — gathered requirements from the marketing team, created user stories, managed project timeline, and coordinated task distribution across developers for seamless delivery.

June 2018 - Jan 2024

Senior Associate Product Designer

Gurugram, India

- **UMANG - One App, Many Government Services:** Revamped the UI/UX of the UMANG government platform (app & web), conducting UX audits and UI testing to deliver a seamless experience for pan-India citizens accessing e-Gov services — handled end-to-end requirements and ensured smooth user experience across all touchpoints.

- **Multi-Domain Project Experience:** Delivered UI/UX design across diverse domains including Real Estate, Healthcare, SaaS, Education, E-Commerce and done multiple POC of projects — ensuring intuitive user experiences, responsive interfaces, and pixel-perfect implementation aligned with business goals.

Parangat Technologies [🔗](#)

July 2016 - June 2018

UI/UX Designer

Noida, India

- Designed mobile and web UI for national and international clients. Collaborated in Agile teams, iterating on designs based on user feedback and usability testing.

Codeyeti (Astrotalk) [🔗](#)
